

## Sennheiser MobileConnect – Information Guide

*MobileConnect is an assistive- and personal listening solution that streams live audio content via WiFi to any iOS or Android phone in the room. This app can only connect to Bluetooth enabled hearing devices.*

### **How to guide:**

1. Download the Sennheiser MobileConnect app on your mobile device
2. Go to your mobile device Wi-Fi network settings
3. Connect to the following network  
Name: MobileConnect  
Password: Hearing1
4. Once your wifi is connected, open your MobileConnect app
5. Scan this QR code:

6. The app will then have you connect your hearing devices
7. Silence your ringer and notifications
