Web Application Developer

Does This Sound Like You?

Are you an IT professional with a passion for web applications? Do you get excited about developing and maintaining a wide array of online platforms? Does partnering with multi-departmental teams to create custom applications sound like your dream job? If so, the **Pittsburgh Symphony Orchestra** is actively seeking a talented **Web Applications Developer** to lead the technical development and maintenance of digital platforms as part of our Technology Team. This is a full-time position based out of our office located in downtown Pittsburgh.

Who We Are:

The two-time 2018 GRAMMY® Award-winning Pittsburgh Symphony Orchestra is credited with a rich history of engaging the world's finest conductors and musicians and demonstrates a genuine commitment to the Pittsburgh region and its citizens. Known for its artistic excellence for more than 120 years, the Pittsburgh Symphony today is lauded as the region's international cultural ambassador. The Symphony's mission is to engage, enrich, and inspire through unparalleled live musical experiences and is committed to their values of excellence, inclusivity, integrity, celebration, and enjoyment.

What You Will Be Doing:

- Leading coding projects for various symphony web sites, both external and internal
- Overseeing web development scoping, planning, and technical architecture for UI and WordPress development projects
- Building and supporting custom applications to support unique business requirements
- Collaborating with departments, supporting 'self-service' actions or determining user requirements, to update relevant web content ensuring cohesion and timeliness using a variety of web technologies including HTML, JavaScript, and CSS
- Managing on-line e-commerce applications, such as ticketing, donations, PSO app and PSO store
- Managing, designing, and optimizing our video platform to ensure the best user experience
- Updating and maintaining all Tessitura-integrated concert e-mail notifications

Your Background:

- 2 to 4 years of web development experience, including working on large-scale web products with a bachelor's degree in Information Technology, Computer Programming, or a related field; equivalent combination of education, training, and experience may be substituted.
- Proficient in SEO/SEM, WordPress, Web project management and strong HTML knowledge
- Knowledge of CSS, JavaScript, PHP, Ajax, and/or other web languages a plus
- Development and integration with SAAS applications
- Strong familiarity with Microsoft development stack
- Development of Web Services / APIs to facilitate integration of data
- Excellent customer service skills including experience in end user training and support
- Excellent project management skills

Pittsburgh Symphony is proud to be an equal opportunity workplace. We are committed to equal employment opportunity regardless of race, color, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, gender identity, or Veteran status.
